

Introducing the NEW HBDI® Profile Package

Herrmann International is excited to let you know about the availability of the new HBDI® Profile Package. The new package, which was redesigned with client feedback in mind, offers easy assembly, efficient facilitation and updated styling to enhance your presentations.

Highlights of the redesign include:

- One booklet with four tabbed sections instead of four separate booklets
- Updated four-color style and graphics
- Minor content edits and additions
- For self processors: Now available in packages of 10 instead of 25

The new packages will begin shipping in April; however, the previous package format will still be available for orders shipped by April 30.

We also recommend that you log in to the [Practitioners Area](#) of the Herrmann International website to access updated resources, including updated HBDI® slides.
